

YOUR WINDOW TO UK AND NORWAY GEOLOGY, DRILLING ACTIVITY AND EXPLORATION RESULTS

- Live, data-driven, web-based map interface
- Interactive text boxes providing the most up-to-date well information, hydrocarbon shows and test data
- Provides a geological setting for your work, with seamless coverage across the UKCS and NCS
- Direct links to UK and Norway Discovery Digest articles
- ArcGIS™ Shapefiles module also available

EXPLORE your
Potential
in the UKCS and NCS

whatmap *Live!*

VALUE-ADDED GEOSCIENCE INTELLIGENCE

- **Up-to-Date** – Well updates panel alerts you to the latest drilling and released well commentaries and enables you to auto-zoom to areas of interest
- **Comprehensive Coverage** – Our experts track all activity offshore UK & Norway
- **Technical Excellence** – In-depth analysis and interpretation by seasoned professionals
- **ArcGIS™** – Suite of ArcGIS™ information available to enhance in-house databases for use in ArcGIS™ and seismic interpretation software

whatmap *Live!*

The whatmap*Live!* provides a geological setting for your work along with expert insights into drilling activity and exploration results.

Including:

- **Well information** – geological commentary on drilling, completed and released wells
- **Hydrocarbon shows** – by age for UK wells
- **Test data** – including reservoir, interval and flow rates
- **Geology** – major faults, source rock maturity and fields by hydrocarbon type and reservoir(s)
- **Culture** – licence layers, quads, blocks, pipelines and coastline
- **UKCS Reservoir Layers** – contoured from an extensive well database, reference data and control points included
- **Barents Sea Kobbe Layers** – top and base contouring

DIRECT LINKS TO DISCOVERY DIGEST ARTICLES

Get direct, map-based links to over 2,000 digest technical articles.

Content typically includes:

- Interpreted seismic lines
- Annotated well logs with lithology, DSTs, etc.
- Stratigraphic columns highlighting zones of production
- Supporting maps and illustrations
- Detailed geological commentary

PLATFORM AND DELIVERY DETAILS

- **Integrated Website** – direct links to Digest articles, electronic alert service
- **Continuously Updated** – monthly spuds/completions, quarterly releases, geology & culture
- **Annual Subscription** – unlimited company-wide access, anytime from anywhere
- **Add-On Module** – ArcGIS™ Shapefiles
